

## KAPPAFLEX 90-0000

Individual hygiene inks for  
printing on personal care products

KAPP-CHEMIE  
TISSUE TEXTILE  
SERVICES

Series KAPPAFLEX 90-0000 represents ready-to-use inks for flexographic printing on nonwovens, based on safe raw materials, especially developed to meet demands in the area of hygiene applications.

Main properties of KAPPAFLEX 90-0000 series are:

- Dermatologically tested
- Made from selected raw materials derived by the European Cosmetic Directive
- Choice of different shades available using Pantone as colour system
- Reliable 24/7 stability on printing units
- Good adhesion to nonwoven substrats
- Production in a separate area with superior hygienic standards

Our sales technicians will be happy to provide you with comprehensive advice.
